

SHUBHAN CHOLIN

Machine Learning - Biostatistics - Data Analysis

☎ +91 63528 18930 ✉ shubhancholin@gmail.com in linkedin.com/in/shubhan-cholin 🌐 github.com/Shubhannn

SUMMARY

Data analyst and researcher obsessed with finding signal in messy, real-world health data. From pooling 30+ epidemiological studies on glaucoma to building a national-hackathon-winning housing model from a 500-row spreadsheet in hours, I turn raw datasets into decisions that matter. Currently sharpening that edge further with an M.Sc. in Data Sciences and Analytics, with one foot in biostatistics and the other in building things that ship.

EXPERIENCE

Research Data Analyst Intern – Glaucoma Epidemiology 📅 11/2025 - Present
Ramaiah University of Applied Sciences, Bengaluru (Remote)

- Contributed to a multi-author epidemiological study integrating glaucoma data from 30+ South Asian studies (100k+ rows); led systematic screening for meta-analysis inclusion, applying standardized case-definitions (POAG/PACG) across studies.

Public Relations Intern 📅 08/2024 - 04/2025
Public Relations Office, St Joseph's University, Bengaluru

- Coordinated logistics, stakeholder communication, and on-ground execution for six flagship university events, including international institutional visits and high-profile commemorative lectures by national public figures.

Data Marketing Intern 📅 05/2024 - 07/2024
OPPO Mobile Telecommunications Corp., Ltd. (Marketing Team)

- Managed on-ground distribution-channel marketing for OPPO's promotional canopies across St Joseph's University, coordinating logistics, scheduling, and customer engagement with company representatives.

PROJECTS

State-wise Disparities in Child Health – NFHS-4 to NFHS-5 📅 03/2026–Present

- Applied paired t-tests, ANOVA, and β -convergence regression: found strong convergence in vaccination ($R^2 = 0.63$) and institutional births ($R^2 = 0.74$), but none in anaemia ($P = 0.458$) despite a significant national rise (48.7%→51.4%).
- Built an OLS model explaining 86.2% of inter-state variance in stunting; used K-means clustering and PCA to construct a composite health-burden index (Spearman $\rho = 0.83$ –0.98 across 4 weighting schemes), flagging a persistent high-burden belt across Bihar, Jharkhand, UP, MP, Chhattisgarh, and Odisha.

NykaaNudge – Chrome Extension for Automated Sentiment Analysis Python, FastAPI, React, TF-IDF, Logistic Regression, Plotly 📅 03/2026 - 05/2026

- Built a Chrome extension and Python ML pipeline for automated review scraping, aspect-based sentiment scoring, and sentiment classification.
- Achieved over 90% extraction success and 85–92% model accuracy, with results visualized in an interactive Plotly dashboard.

Real AI Guardrails 📅 01/2026–02/2026
Python, FastAPI, FAISS, Azure, Docker

- Co-developed an LLM reliability application for hallucination detection and context-degradation prevention in multi-turn AI conversations.
- Designed the hallucination-detection logic using FAISS-based vector retrieval to verify outputs against grounded context; built and deployed the FastAPI service layer. Deployed: real-ai-backend.azurewebsites.net

Shubhi's Casino – Synthetic-Money Gambling Simulator 📅 10/2025–12/2025
Python, Flask

- Built a risk-free gambling simulator (Rock-Paper-Scissors, Coin Flip, Dice Even/Odd) modeling probability and loss dynamics with synthetic currency; designed an OOP architecture (each game as a class) behind a Flask controller with timestamped logging. Deployed: rock-paper-scissors-zeta-gray.vercel.app

KEY ACHIEVEMENTS

Winner, National-Level Data Hackathon – “Mini Mansion”

Ideathon 2026, CHRIST University, Bangalore

Solo-won by analyzing a raw dataset (30+ columns, 500+ rows) on student housing satisfaction; identified privacy and utility quality as top satisfaction drivers and designed a data-driven, pod-based micro-housing solution. minimansionpods.vercel.app

Best Outgoing Undergraduate – 2025

St Joseph's University, Bengaluru – recognized as the top undergraduate across the institution for academic excellence and overall contribution.

National-Level Data Science Competition Wins

Winner, Shark Tank (DataMaze 2023) and Adam's Pitch (DataMaze 2024) – CHRIST University's national Statistics & Data Science fest.

EDUCATION

M.Sc. Data Sciences and Analytics

Ramaiah University of Applied Sciences, Bengaluru

CGPA: 9.5/10

📅 Exp. 2027

B.Sc. Statistics and Computer Science

St Joseph's University, Bengaluru

CGPA: 7.5/10

📅 2022–2025

LEADERSHIP

Founder, SHUP – Advertising & Digital Marketing 📅 2024–Present

MSME-registered, UDYAM-GJ-09-0045700

shup-skillup.base44.app

- Founded and operate a registered advertising and digital marketing venture, managing financial planning, digital marketing strategy, and an educator-led skills vertical.

SKILLS

Programming & Analysis: Python, R, SQL, Pandas, TensorFlow, PyTorch, SkLearn, Matplotlib.

Visualization & Tools: Power BI, Advanced Excel, Git/GitHub.

Deployment & Backend: FastAPI, Docker, Azure, MySQL.

EXTRACURRICULAR

Convenor & Treasurer, Departmental Associations 📅 2023–2025

Frequentia (Statistics) & Cybernetics (CS Assoc.), SJU

- Led Frequentia (Statistics Association) across two terms, overseeing event planning and outreach; served as Treasurer & Sponsorship Head for Cybernetics (CS Association)

Contingent Lead/Captain 📅 2023–2025
DataMaze, Manthanein, Technack (National Fests)

- Captained university contingents to 2 Overall Championships and 1 Overall Runners-up at national-level fests.

CERTIFICATIONS

Machine Learning, Deep Learning & NLP – Udemy
JPMorgan Chase & Co. Quantitative Research Job Simulation – Forage
